

Iridium AccessPoint

Extending Personal Communications

Beyond satellite phones: **the smartphone experience everywhere**

People everywhere are moving beyond the reach of traditional networks, and they expect their connected experience to travel with them. Iridium's ongoing innovation in real mobile, real global communication is helping make more of these connections that matter – across the entire surface of the planet, in ways never thought possible.

Iridium has a unique vision for using the power of the world's furthest reaching network to bring extended and enhanced personal communications to people and organizations, everywhere.

Iridium AccessPoint

Iridium has developed a new suite of Wi-Fi-enabling accessory and software solutions giving people the ability to use smartphones, tablets and laptops far beyond the reach of existing terrestrial networks. Designed to connect to your Iridium satellite phone and establish an Internet connection wherever you are in the world, these products are extending communications capability like never before.

Note: Iridium AccessPoint accessory and software solutions will be available October 2011 for Blackberry, Android and Windows based solutions. Capability for IOS devices expected to deliver late 2011.

Iridium AccessPoint

The Iridium AccessPoint Wi-Fi hotspot accessory combines with your Iridium Extreme or Iridium 9555 satellite phone to create an instant Wi-Fi hotspot. This enables you to use your trusted devices to check emails and stay connected to the office, or keep in touch with family and friends – anytime, anywhere.

Features

- **Plug and play functionality** – users simply connect their Iridium AccessPoint via USB cable to an Iridium Extreme or Iridium 9555 and locate the specified network connection on their device.
- **Small, light and portable** – Iridium AccessPoint offers a mobile Wi-Fi range of 60 to 100 feet, allowing users to move around.
- **Multiple connections** – Iridium AccessPoint can connect multiple smartphones (Blackberry, iOS or Android), tablets and laptops for emailing and light web browsing.

Iridium AccessPoint Mail & Web

Iridium AccessPoint Mail & Web offers customers an enhanced user experience. The Iridium AccessPoint Mail & Web software is included with the Iridium AccessPoint accessory or can be downloaded from Iridium.com and optimizes the connection to enable up to 15x faster email connections and up to 5x faster web browsing than using the Iridium AccessPoint accessory alone.

Iridium AccessPoint Connect

Using Direct Internet compression software, Iridium AccessPoint Connect allows you to use your Windows laptop in combination with your Iridium 9555 or Iridium Extreme satellite phone to establish an Internet connection, everywhere. Enabling your own applications and other trusted devices, the software is ideal for customers wanting to create a cost-effective WiFi hotspot with smartphones or tablets.

Only one communications company connects the entire globe

Iridium commands the world's furthest reaching network, making it the only truly global communications company with solutions that span from pole-to-pole. Iridium voice and data products provide superior communications solutions that allow global companies, government agencies and individuals to stay connected everywhere. With a unique, global ecosystem of partners, Iridium continues to create new, high-value capabilities that are leading the world into a new era of communication.
